Service Availability and Pricing:
Service availability is dependent on geographic location.

NBN Speeds:
Currently Bendigo Bank Telco offers NBN plans delivered to the customer site via the NBN Co Fibre Access Service. The actual speed of your service will vary according to the nature and quality of the connection at the customer site, network utilisation and the number of end users accessing the network at any one time, the end user’s hardware or software and the web sites the end user is visiting.

Installation:
Non-standard installations may incur additional charges. NBN Co will advise you of any such charges prior to installation. Your approval and acceptance of these charges will be sought prior to work commencing.

You must obtain the consent of the property owner to have the NBN installation performed. If you are not the property owner, you will need to obtain the property owner’s written consent (dated and signed), and be able to provide that to Bendigo Bank Telco upon request.

NBN services are not currently available in multiple dwelling units (MDUs). The cabling that is required in your premises beyond the optical network termination device is your cost and responsibility, as is the provision of a suitable 240V AC power outlet.
