Service Availability & Pricing
Service availability is dependent on geographic location. Services will be connected to either On-net or Off-net. Broadband zones are based on the industry’s current zoning of Telephone and Broadband exchanges. To confirm which zone applies to your broadband service, please speak to a customer service representative.

Broadband Speeds
We will always connect you to the highest available speed. Where possible this will be an ADSL2+ connection and where ADSL 2+ is not available to you will be provided with an ADSL 1 service. Broadband speeds are impacted by a range of factors including the length and quality of the cooper line between your premises and the exchange, your computer’s set-up, the quality of your broadband modem and line filter. The number and type of services being used in your area as well as the configuration of any computer you are trying to access can also impact the speed.
