

PCI CERTIFIED NETWORKING

At Bendigo Telco we have a nationwide MPLS network that delivers Virtual Private Networking services to business. Our network infrastructure is a highly resilient and reliable delivering industry leading SLA's. For your business this means:

- Higher Network Throughput
- Increased Network Uptime
- Decreased Productivity Losses

Best of all, Bendigo Telco can provide you with these critical business services across a network that is certified as PCI compliant. Bendigo Telco is fully compliant with all 12 Sections of PCI, and this means far simpler PCI compliance for our customers. We are experts in network encryption and can deliver your data across our network fully encrypted – end to end.

Businesses that use our PCI Compliant Networking can rely on our PCI certification for broad sections of their own PCI compliance. This is particularly true for PCI Sections 1, 2 and 12.

Bendigo Telco provides our customers with all of the guarantees required in section 12 of PCI. As a Certified PCI Service Provider, we will take responsibility for the security of your data.

Bendigo Telco's PCI compliance has been conducted by industry-leading PCI Certification Company – K3DES – who have certified some of the giants of the finance industry including PayPal Inc.

Our PCI certification ensures that we can deliver an end to end technology solution for your business that is fully PCI compliant. Bendigo Telco's compliance status means a lower cost for your company when you implement networking technology because you can simply reference our PCI status in your own compliance framework.

We have significant experience in the delivery of PCI certified networks with one of Australia's largest Banks relying on our PCI Certified Network for their branch banking connectivity and also for more than 1000 of their ATMs.

WHAT IS PCI?

The Payment Card Industry Data Security Standard (PCI DSS) is a set of security standards designed to ensure that all companies that accept, process, store or transmit credit card information maintain a secure environment.

The Payment Card Industry Security Standards Council (PCI SSC) manages the ongoing evolution of the Payment Card Industry (PCI) security standards with a focus on improving payment account security throughout the transaction process.

- Our certification ensures that we can deliver an end to end technology solution for your business that is fully PCI compliant.

THE BENDIGO TELCO DIFFERENCE

We are a "customer and community focused" managed services provider and deliver a wide range of 'telco' services to several markets, but our focus is on the business & enterprise sector.

We have invested in our own regionally based Tier 1 and 2 Data Centre and Australia-wide network infrastructure that allows us to deliver our services to any regional or metropolitan area.

Bendigo Telco has been in operation for 20 years and we have a strong community focus that drives the success of the company. Technology enablement is extremely important to us and connecting our community for a better future.
