OTHER INFORMATION

Connection & Restoration Timeframes

Where you request a new connection we will endeavour to connect the service on the date requested. All service connections are subject to appointment availability.

The Customer Service Guarantee (CSG) sets out minimum performance standards in relation to fixed line service connection times, fault repair times and keeping appointments. A copy of the (CSG) is accessible from the relevant website listed at the bottom of this document.

Broadband Service Availability & Pricing

Service availability is dependent on geographic location. Services will be connected to either Zone 1 or Zone 2. Broadband zones are based on the industry's current zoning of Telephone and Broadband exchanges. To confirm which one applies to your broadband service please speak to a customer service representative.

Broadband Speeds

We will always connect you to the highest available speed. Where possible this will be an ADSL2+ connection and where ADSL 2+ is not available to you will be provided with an ADSL 1 service. Broadband speeds are impacted by a range of factors including the length and quality of the copper line between your premises and the exchange, your computer's set-up and the quality of your broadband modem and line filter. The number and type of services being used in your area as well as the configuration of any computer you are trying to access can also impact the speed.

Other Services

We can provide you with a range of extra services on your fixed line service. Some services will attract additional fees.

Usage Information

We recommend that you use our SmartCentre application to track your usage. It is available at the relevant website listed at the bottom of this document. Once you have a SmartCentre account, you'll automatically receive alerts when you reach 50%, 85% and 100% of your included monthly allowance(s).
